

IN-KIND DONATIONS

INFO SHEET

WHAT ARE IN-KIND DONATIONS?

With referral to a skatepark project, In-Kind Donations are various building materials and services that can be contributed to a project in place of cash to assist in maximizing the value of your skatepark project.

Our goal is to provide you with a skatepark that gives you the greatest value possible. Many of the materials and services required in the construction of a skatepark are common in most general construction projects. This is good news for your skatepark project as in-kind donations are a highly effective approach for attaining the most value possible in your skatepark's design!

With in-kind donations appropriate to the project's construction requirements, this opens up the opportunity for you to increase the size, number of features, aesthetic design features, or additional site amenities, establishing your park as a recreational space that people want to visit and brings your community together.
